University of Transport and Communications, Ho Chi Minh City

PROFILE

Enthusiastic Information Technology student with a strong passion for front-end development. Skilled in building responsive and user-friendly web applications using React (TS/JS) and Next.js. Have basic experience with design tools such as Figma and Photoshop. Eager to learn, adapt, and contribute to real-world projects as a Front-End Developer Intern.

PROJECT

Book Forum Mobile App
TEAM SIZE: 5 | MAY-2025

⬤ https://github.com/Nam-TranDang/Mobile_TS_ReactNative

Description:
A mobile application for book lovers (Android/iOS) with a separate web-based admin panel. The app provides user profiles, posts, likes, comments, and real-time notifications, while the admin panel manages users and content.

Responsibilities:
- Built the mobile front-end with React Native, ensuring smooth performance and responsive UI.
- Developed the admin panel using React + Vite for user and content management.
- Integrated real-time features (likes, comments, notifications) using Socket.IO.
- Designed and prototyped UI/UX in Figma.

Technologies: React Native, React, Vite, JavaScript, Node.js, MongoDB, Socket.IO, Figma, GitHub

Regional Food E-commerce Monorepo
TEAM SIZE: 4 | JULY-2025

⬤ https://github.com/lenvalen14/regional_food_ecommerce

Description:
Description: A monorepo-based e-commerce platform for regional specialties, enabling customers to browse, order, and pay for local products.

Responsibilities:
- Designed and implemented user interfaces for the main shop, product listing, and product detail pages using Next.js and TypeScript.
- Developed responsive layouts and reusable UI components with Tailwind CSS and shadcn/ui.
- Integrated API endpoints for order management and payment workflows, connecting backend services to the frontend.
- Ensured seamless user experience for browsing products, placing orders, and processing payments.

Technologies: Next.js, React, TypeScript, Tailwind CSS, shadcn/ui, Lucide Icons, RTK Query, Figma, Java, Spring Boot, Swagger, PostgreSQL, GitHub
